If your professional goals revolve around computers, then Lehigh Career & Technical Institute’s IT Academy is the perfect place to start. The academy offers four pathways that point students toward college degrees and lucrative careers in the rapidly growing field of computer science.

- Administrative Office Technology/Accounting
- Computer Information Technology
- Computer & Networking Technology
- Web Design/Web Programming

All first- and second-year academy students follow the same curriculum so they can begin building the broad knowledge base employers expect of IT professionals. In their third and fourth years, students focus on mastering concepts and skills aligned with their chosen specialty.

GET MORE OUT OF HIGH SCHOOL

Our career and technical education programs introduce students to the skills they need to pursue high-wage jobs in demand across the Lehigh Valley. That’s why LCTI is the smart choice for students who want to be college and career ready when they graduate.

ADMINISTRATIVE OFFICE TECHNOLOGY/ACCOUNTING: Computers are indispensable tools of the modern office. Administrative Office Technology/Accounting students learn how they’re used to manage an organization’s money, employees and more. Ultimately, they master the clerical and administrative duties that keep an office humming.

COMPUTER INFORMATION TECHNOLOGY: Daily headlines about hacking are a constant reminder that the convenience of computers comes with pitfalls. Computer Information Technology students explore what it takes to manage, analyze and secure data as they learn a variety of software, programming languages and skills.

COMPUTER & NETWORKING TECHNOLOGY: Computers are an integral part of today’s workplace, so an in-depth understanding of computer systems is an invaluable skill set. Computer & Networking Technology students discover how an affinity for computers can lead to a rewarding career in information technology.

MARKETING & BUSINESS EDUCATION: Small businesses drive the American economy. Marketing & Business Education students learn what it takes to run one and give substance to the entrepreneurial spirit. They take on the everyday operations of LCTI’s school store and much more.

PRINT TECHNOLOGY/GRAPHIC IMAGING: Business cards, catalogs, custom t-shirts—all of these everyday items are products of the graphic communications industry. Print Technology/Graphic Imaging students explore this multifaceted industry as they learn about graphic design, print production and more.

WEB DESIGN/WEB PROGRAMMING: Just about everyone and everything has a web presence these days. Web Design/Web Programming students design and build compelling websites from scratch as they explore a career field with an employment growth rate nearly four times the national average.
